

Students who take a bus will no longer have to walk to and from Maple Avenue. Busses will now drive into the new parking lot and load or unload students in a bus lane. This will allow students to progress quickly and safely into the school via three different entrances.

There are also new restrictions and signage to help traffic flow and increase safety. These include:

1. Drivers will no longer be able to pull up to the front doors of the school for pick up or drop off. This area will be restricted to busses and emergency vehicles only.
2. Cars will only be permitted to turn right both entering and exiting school property, so please plan your route accordingly
3. The driveway off Guelph Street at the lights across from Albert Street will be for bus and emergency vehicles only.

On Monday, administrators will be at various points to help guide traffic. Click to see a detailed diagram of the new parking lot, with arrows indicating traffic flow. Thank you for your cooperation and flexibility as we complete phase one of the renovation and now move into phase 2.
